

📍 Switzerland, Meyrin

## Applications Engineer Microlution

### Your tasks

- Conduct test cuts and machine demonstrations to showcase the capabilities of our equipment.
- Perform test cuts to analyze machine performance and identify opportunities for improvement in test cut deficiencies.
- Develop and conduct training programs for customers and staff.

### Your profile

- **Strong technical knowledge:** A minimum of three to five years of experience in relevant machining operations, or an equivalent combination of education and experience. This includes a solid understanding of machine tools, CNC programming, and manufacturing processes.
- **Proficient in CAD/CAM Programming Solutions:** Demonstrated proficiency in CAD/CAM programming solutions, such as AutoCAD, SolidWorks, or similar software. The ability to create and modify programs for machining operations is essential.
- **Language proficiency:** Fluent in English at a B2 level and French at a B2 level. This proficiency is necessary to effectively communicate with customers, both verbally and in writing.

### Who we are

GF Machining Solutions is the world's leading provider of machine tools, diverse technical solutions and services to manufacturers of precision molds and tooling and of tight-tolerance, precision-machined components. The key segments we serve include the aerospace, automotive, medical, energy, information and communications technology (ICT) and electronics industries
